

## Summer Math Assignment

June 2016

Attached you will find the summer math packet for Summer 2016. It contains approximately a page of math problems for every week of the summer. All of the worksheets review material that we covered during the course of this school year. If you are unsure of how to do something, Khan Academy, IXL and the GreatMinds.net (Eureka) website can help you figure out how to complete the problems.

Your summer math assignment is due on the first day of school in September.

In addition to the practice pages attached, IXL is a useful tool for practicing your math over the summer. You should work in grade levels at or above the grade you will be in this fall. IXL is helpful because it provides immediate feedback. If you need help remembering your log on or password, please see Mrs. Boone or Mrs. Hawk prior to the end of the school year!

Have a great summer! Go MATH!

Mrs. Hawk and Mrs. Boone
