

## Incoming 5th Grade Math

Welcome to 5<sup>th</sup> grade math! We will get started right away in September, so let's make sure we don't forget what we learned.

Required: You need to complete the following over the summer.

- **Spend at least 30 minutes per week reviewing 4<sup>th</sup> grade skills on IXL.**  
Summer is 11 weeks long, so this amounts to *at least* 5.5 hours total. There are 1,848 hours of summer vacation (give or take), so this is only a tiny fraction of your vacation!
- For this review, focus your practice on skills related to computation: Sections A through F, K, T, U. (Practice in other areas is, of course, acceptable as well.)

I am excited to have you in 5<sup>th</sup> grade math and look forward to helping you become successful mathematicians. Have a terrific summer and e-mail me with any questions you may have as you work on these summer math activities.

Mr. Meaux
